Imagine a dirty coal terminal on the Columbia River.

We can do better!

NO COAL EXPORTS

no coal export

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County,

I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

I'm concerned that building the shipping terminal at Long View near the mouth of the Columbia - will not only increase big tanker traffic But that area will have to be dredged more often by the Army Corps of Engineers - This will have to be paid for by the Fed. Gov't - So again Big Corporations will benefit from ruination of our environment (from the Coal mines in E. MT, to coal dust + Mercury in the Spokane River + Lk. Pend O'reille to the poisoning Salmon near the Mouth of the Columbia. Please study the Financial impact on the mouth of the Columbia (Dredging)

~~Please study the impact of~~

Thank you Inga Boyles
